

EXTRA PRACTICE 1-6

BAR GRAPHS AND LINE GRAPHS

EXERCISES

Use the bar graph for Exercises 1–5.

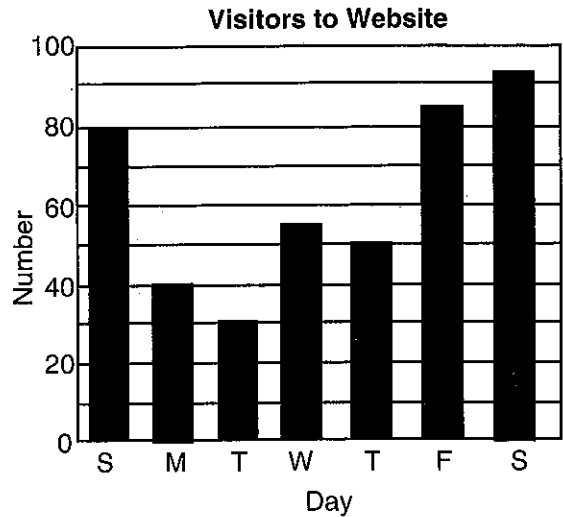

1. Which day of the week did the most people visit the website? Approximately how many visits were there?

2. Which day of the week did the fewest number of people visit the website? Approximately how many visits were there?

3. Which days had over 50 visits?

4. About how many times more visits were there to the website on Saturday than on Tuesday?

5. Estimate on which day the number of visits was about one-half the number of visits on Sunday.

Use the line graph for Exercises 6–8.

6. On which day was the high temperature the greatest? Approximately what was the temperature?

7. Between which two consecutive days was the difference in the high temperatures the greatest? What was the approximate difference in the temperatures?

8. Between which two consecutive days was the difference in the high temperatures the least? What was the approximate difference in the temperatures?
